

Web Developer c#.net

We are reallymoving: The UK's leading online provider of quotes for home moving services, with over 2 million registered users. Each year 1 in 5 people who move to a new house use our services to simplify their house move and save money. We work with a UK-wide network of partners, which represents approximately £200 million worth of work for them per annum.

Our sister site is The Law Superstore: The UK's first comparison website for legal services. We're aiming to make it easy to find and compare legal services for services as diverse as making a will to getting a divorce.

Both our sites are dedicated to giving people the information they need to navigate important life decisions, whether that's buying their first home, preparing a will or going through a divorce.

We put the customer first, giving them all the information they need to make an informed decision, whether that's price, reviews or helpful guides. We connect people with the experts they need, like conveyancers, lawyers, will writers, surveyors and many more. We focus on excellent user experience, a high quality site and we develop tools to make life easier.

Whatever life decision we're a part of for our users, we take that seriously and we want to make sure it's the best experience it can be.

About the role

We are looking for a Web Developer to join our friendly and collaborative team to help us move towards a microservices architecture as well as maintaining/developing our existing suite of applications. You will be working with cross functional teams to define initial requirements through to development and release.

About you

Education/qualifications

- Bachelor's degree in computer science or related subject or relevant commercial experience in a related role

Skills, knowledge and abilities

- You will have solid commercial experience in C# and .NET application development
- You have worked with .NET MVC and/or Core/.NET 5
- You have worked with SQL Server, Git and you have created W3C compliant HTML
- You have previously worked in an agile (Scrum) environment
- You enjoy being part of a highly collaborative team
- You communicate well at all business levels (both written and verbally)

- You love clean well-crafted code and unit tests
- You are passionate about development and keeping up to date with technology
- You can write occasional JavaScript and CSS when required
- You have a good appreciation of security and web accessibility

Knowledge of any of the following would be advantageous:

- CMS platforms (we use Kentico)
- Azure services
- Azure DevOps
- ASP.NET Web Forms
- Entity Framework
- Creating and interacting with APIs and microservices
- Continuous integration and deployment
- Use of or willingness to try modern techniques such as pair programming, TDD and BDD

Motivation

- Ability to work on own initiative
- Willing to adapt and learn new skills
- You will also feel at home with our values;
 - **Customer obsessed:** We start with the customer and work backwards
 - **Ambitious:** We think long term, we think big and we value calculated risk taking
 - **Humble:** We are vocally self-critical and respectfully challenge others' opinions
 - **United:** We are one team
 - **We're people people:** We care about our colleagues and the communities we live and work in

What can we offer you?

- A competitive salary
- A discretionary annual bonus opportunity
- 25 days holiday per annum plus all bank holidays
- An extra days leave when you move house (per annum)
- Flexible approach to hybrid working
- Enhanced Pension Scheme
- Free unlimited book allowance for work-relevant publications
- A generous annual training budget of up to £1000 Individual per employee for professional development including payment of professional fees
- Cycle to work scheme (We love cycling!)
- Free Eye Care voucher
- Free flu vaccinations
- Employee Assistance Programme 24/7 offering a confidential and professional helpline on various matters such as relationships, work, bereavement, stress, financial issues.
- Community day each year
- Regular social and team building events
- Our office is in the middle of historic St Albans central to shops, bars and restaurants
- To be surrounded by brilliant, talented and fun people in a growing business
- An opportunity to work with a growing brand and on a product with an ambitious roadmap

- An opportunity to work with advanced web technologies and be part of a culture that encourages innovation

What to expect from our recruitment process.

- An HR screening interview (45 minutes using Microsoft Teams or by phone)
- A biographical and competency-based interview with our Software Development Manager and a Senior Developer (1 hour using Microsoft Teams)
- A coding exercise (details TBC)
- A final Interview with our Head of Technology and our Software Development Manager (1 hour using Microsoft Teams)

Reallymoving is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees. We recognise the benefits of a diverse workforce which reflects the wider population and welcome applications from all sections of the community.

Sadly, we are unable to sponsor employment visas at this time and therefore we can only accept applications from candidates with the permanent Right To Work in the UK.

If you are interested in this role and joining the reallymoving team then please send your CV and cover letter to us at jobs@reallymoving.com.
